Dear Carl,

Have you Weighed the 1802's? The Standard Weight should be 84 Grains. Remember all 1802 Dated Coins Were struck from spoiled large Cents, While almost all other dropped bust ½ cents Were struck on Prepared Planchets from Boulton. The Prepared Planchets had reims on them While planchets Made for other Coins IE Spoiled Cents + TAL TOKens would Not have the upset Rim Struck as the Boulton Planchets did. This overstrike tend to look Thinner. The only Way to really Tell is to Weigh the Coins.

Since you're in the area Perhaps We Can Meet at Some time I do have a scale that the 1802's Could be Weighed on. You Can Call Me on 279-7700 during the day.

Sincerely

Bogle
